

## REQUIREMENT SPECIFICATION FOR RECEIPT

This is part of the receipt module under the sales management module. This module is aimed to help the user by providing a form that will help him/her enter the necessary information in order to issue a receipt to the customer.

### FUNCTIONAL REQUIREMENT

- This module will create a form that will help the user fill in information such as; product name, product ID, price, and so on.

The screenshot shows a web form for creating a receipt. It includes fields for Name (First and Last), Shipping Address (Address Line 1, Address Line 2, City, State, Zip Code), Email, and Phone. Below these is a 'My Order' section with a table for items. The table has columns for Item, Product, and Quantity. A 'Print Receipt' button is at the bottom left, and a 'Submit' button is at the bottom right.

Item	Product	Quantity
Item 1		1

- In the course of filling the form, some arithmetic operations such as (quantity X unit price = total price) will be performed to ease the user's job.
- Once done filling out the form, the system then displays the receipt to the user.

The screenshot shows a printed receipt titled 'Shop Receipt'. It includes a receipt number (Nr.: 0003568) and a table of items. The table has columns for Code, Qty, Description, and Price/\$. Below the table, it shows the Date, Time, Subtotal, Tax, and Total. The address is listed at the bottom.

Code	Qty	Description	Price/\$
0598	1	Lorem Ipsum	2.25
2365	2	Lorem Ipsum	16
7459	1	Lorem Ipsum	0.99
4002	3	Lorem Ipsum	5
3050	2	Lorem Ipsum	5.5
0598	1	Lorem Ipsum	8

Date: 01/01/2020 Subtotal: 36.74  
Time: 05:37 pm Tax: 2.9  
TOTAL: 39.64  
Address: Street, City, Zip

- The user will have the ability to print the receipt.
- The receipt will then be stored in a database.
